

US 41 – US 45 Interchange

Schedule: August 2010 to September 2012

Location: US 41/US 45 interchange.

Description: This project involves construction of multiple structures including bridges, box culverts, retaining walls, and sign bridges along with grading, base aggregate, concrete and asphalt pavements, concrete curb and gutter, and pavement marking.

September 10 to September 14: Finished grading of material storage areas. ITS conduit was completed.

September 17 to September 21: Punch list items will be taken care of.

Traffic impacts: The left lane of northbound US 41 is closed. The left lane of southbound US 41 is closed. Traffic will remain in the two right lanes. The speed limit through the project is reduced to 55 mph. Traffic should be alert for vehicles entering and exiting the highway from the median side.
